

Recreational Use Conflict

Dave Marcouiller & Ian Scott
University of Wisconsin – Madison/Extension

Jeff Prey
Statewide Recreation Planning - WDNR

A QUEST FOR EXPERT OPINION...

1. Overview of project
2. Spectrum of interaction
3. Solicit your opinion
 - Type of interaction
 - Management strategies

Conflict Project:

Part of Wisconsin SCORP 2005-2010

Deliver management-relevant outputs:

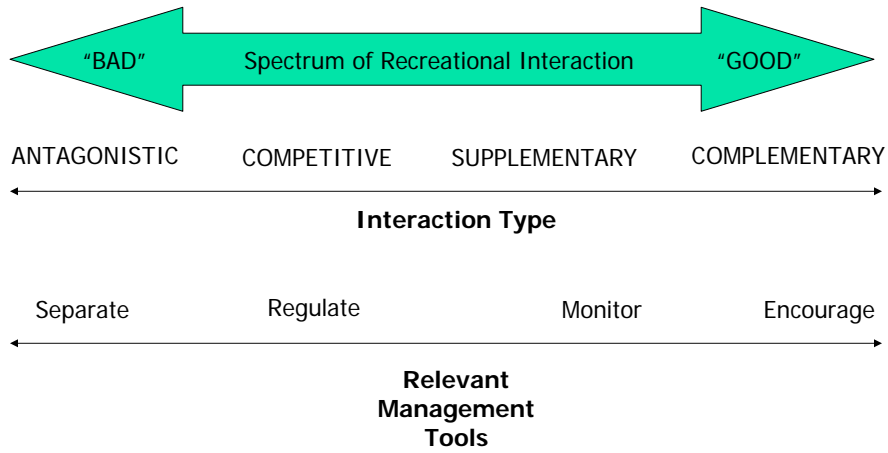

- Literature review & overview of norms/satisfaction
- Develop a matrix of recreational interactions
- Strategize - existing & creative approaches to manage interaction

Managing interaction:

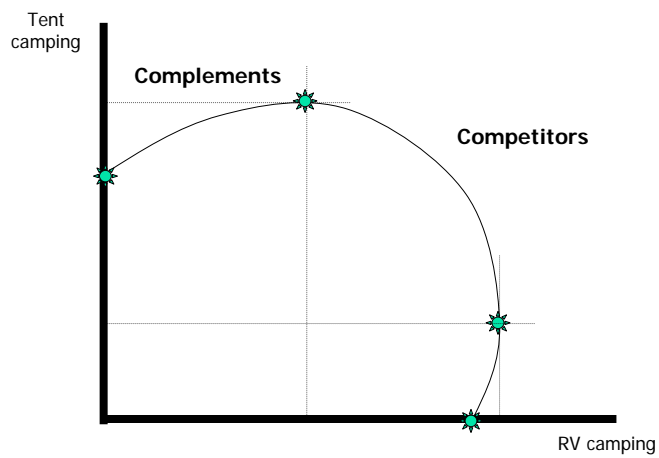

- Maximize supplementary and complementary recreational uses (emphasize the glass half-full)
- Minimize competitive conflicts through regulation
- Separate antagonistic competitors (segregated use)

Spectrum of Interaction

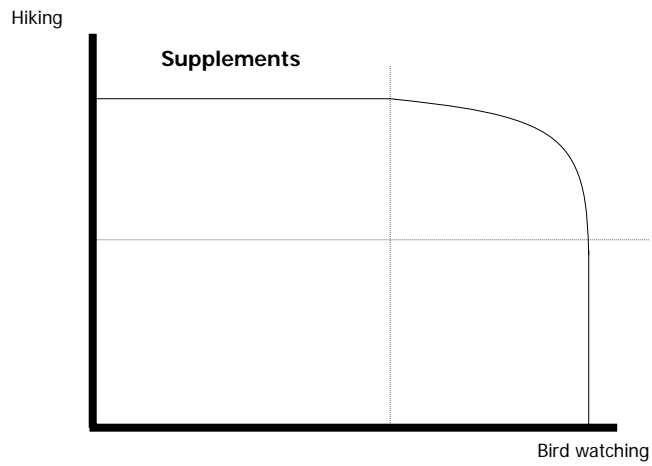

Competitive & Complementary Uses

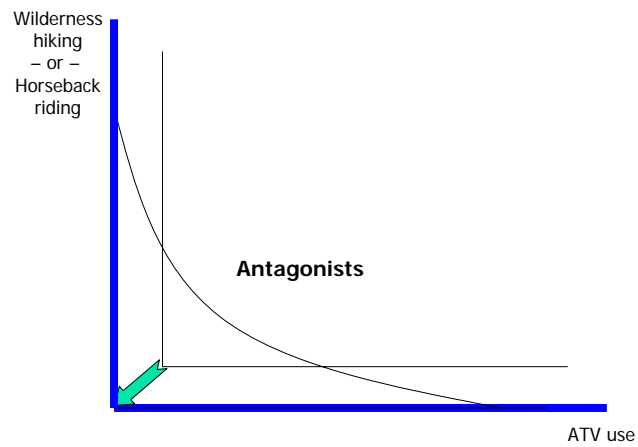

Supplementary recreational uses

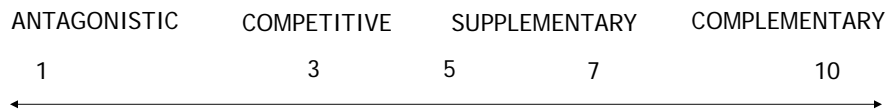

Antagonistic competition

Scale for Interaction Type

For our exercise today, let's use this scale

In addition, please identify interaction caveats including:

thresholds, geographic scale, and mitigating/compounding factors

How does camping interact with:

- Hunting?
- Fishing?
- Biking?
- Watching Wildlife?
- Hiking?
- Horseback Riding?
- Snowmobiling?
- ATV Riding?

How does ATV riding interact with:

- Hunting?
- Fishing?
- Camping?
- Biking?
- Watching Wildlife?
- Hiking?
- Horseback Riding?
- Snowmobiling?

Strategies

- How does segregation work to alleviate antagonistic recreational use?
- How about regulation with competitive uses?
- Is "encouragement" a feasible opportunity for complementary uses?
